Hosting Package 1 is intended as hosting for standard non-critical business websites. It is generally suitable for websites that do not handle payments, have no PCI-DSS compliance requirements (or outsource payment processing)

Service Availability

We do not guarantee service availability beyond our best efforts. Hosting Package 1 does not provide any failover provision.

If you require DDoS protection, distributed services, failover hosting, cloud hosting, DNS failover, CDN or similar, we have these options and can provide details on request.
